a Generic NBV

b Manipulation-aware NBV

$$G_g(v) = \alpha \sum_x w_t(v, x) u_t(x)$$

All observable deficit contributes

$$G_o(v) = \alpha \sum_x w_t(v, x) u_t(x) M_{op, t}(x)$$

Only stance-relevant deficit contributes

Spatial schematic, not a measured map or predicted winning viewpoint.
